

A Project to Reform the Notary Industry

NotarTech

By Tech Geeks

What is notary and notarization?

A **notary** is a person licensed by the government to perform acts in legal affairs, in particular witnessing signatures on documents.

The form that the notarial profession takes varies with local legal systems.

Notarization is the official fraud-deterrent process that assures the parties of a transaction that a document is authentic, and can be trusted. It is a three-part process, performed by a **Notary**.

Challenges of the traditional notary industry

The flow of information is slow
Information is kept in different institutes.

The process is time-consuming
Notary spends time on verification.

The database is going to be saturated
Due to the increasing amount of information.

Solution provided by NotarTech

NotarTech is a third-party platform providing blockchain technology to notary public and law firms. It is believed that the non-editable blockchain can help to solve the obstacles which the notary industry is facing:

Increase the
efficiency
of notarization

Prevent
the leakage
of information

Lower
the cost
of verification

Reduce
the rate of
mis-verification
